How to Make a Word Splash  

This is a great activity for any vocabulary words!

1. If the Draw Toolbar is not showing, go to View, Toolbars, Drawing.

2. Click on the slanted A.

3. Choose the style you want and click OK.

4. Type in your text.

5. You can now resize the text and/or move the text.

6. Continue in this way until you have completed the word splash.

You may need to resize the words and move them to different spots on the paper.

Leave space by each word. The students could then illustrate the words.

If you have done this several times with the class, you may want to try a few students making a word splash on their own using the classroom computers. If they are successful, they may be able to help other students in your class.
